STATE OF VERMONT. Rutland .- .. William March

In Chancery, 5th January 1843. William Ayres. Whereas William Marsh of Shrewsbury in the county of Rutland, has filed his half in chancery a gainst William Ayres of Shrewsbury aforesaid, now gone to parts unknown, Statiss, that on the 22 day of April, 1840, the defendant being indebted to the orator by several notes of that date, in the sum of \$530 00 .- four for \$100 00 each, parable in one year, one in 2 years, and one in four years from date. with annual interest, one for 24 00 payable 1st o March 1841, one for \$18 00 one for \$35 00 payable 1st March 1812, one for \$12 00 payable 1st March 1843, and one for \$6 00 payable 1st March 1844. the 6 last notes payable in wood with annual interest; and to secure the payment of said notes, the defendant executed to the orator's deed of mortgage. conditioned for the payment thereof, of the followlowing described land in Mountholiv, described as follows, viz. bounded West on lands owned by Levi Gates and Elnathan Mattocks; south by land owned by Isaac Dickerman, and east on lands of Amas. Dickerman, north on lands owned by Allen S. Marsh and Levi Gates, being the same land that day convered to said Ayres by said Marsh; and PRAFING, that this court would decree that if the de fendant fail to pay the sums due on said notes, he shall be forever foreclosed from all right to redeem said mortgaged premises, and that the orator may

The usual process of subpoint being granted and the said William Avres being absent from this state, and not having been notified of the commencement of and bill, it is ordered by the Court, that he be notified thereof by publishing the substance of said bill with this order, in the Rutland Herald, printed in Ratland, three weeks successively, the last of which to be at least twenty days previous to the next term of this Court to be held at Rutland, in and for said county, on the second Tuesday of April A. D. 1843, and day thereof was given, &c

## DR. HIBARD

WOULDtake this method to inform the intabitants of Rutland and vicinity that, naving purchased the premises formerly owned by J. C. Dexter, her, anoth of the stage house, he intends to follow the practice of Meanine, in all its varied ranches, and hopes to merit a share of public putomega, by a close attention to his business, tempercare in his habits, and hair and honorable dealing with his customers. His practice, for ten years jost, has been predicated on the principles of the "Row toek," (or vegetable practice,) as taught in New York City, and College at Worthorston, Ohio.

To those who are unacquainted with the system, the subscriber would inform them that the Reform ed practice was instituted, and a medical school es ished in the city of New York, in 1829, by W Beach, M. D. and new president of the Reformed Medical Society of the United States. Dr. B. established a board of professors in this school on the tranches of medicine, viz Anatomy, Physiology, Surgery, Chemistry, Materia Medica, Botany, Ob-sterries, Theory and Practice of Physic, and Medical Jurisprodence, which were as scientifically taught as at any medical college in the country. this practice, no calomel or other poisoners said al is administered, but the Vegetable Kingdom is wholly relied on to core or relieve the sufferings of mankind. About 1829, a grant for a College was obtained from the Legislature of Ohio, which soon trent into successful operation, at Worthington in that state, and still flourishes almost without a parallel in the history of any institution. This practice has nearly, in that siste, supplanted the inneral practice, as well as in N. York and other states -This practice is different from all others, from the fact that it is continued y improving, and as diseases the varies accordingly. Why not retorm or unprove the practice of medicine as well as any other art or science! The Mineral Practice has had no important improvement for nall a century; and abmost at vegetable practitioners of the day are very much inwant of scientific knowledge in Anatomy, Surgery etc. But the Reformed Practice embraces the good of all systems now in vogue, in this country. The subscriber is a graduate of the Re knows from an experience of more than ten years. that the vegetable practice is more safe and scientifent adherents of that practice acquainted practically, with this extensive vegetable practice, they would willingly lay aside their minerals; and common charmy prompts me to say it. Di H, was an office ssudent of Dr Beach, and for more than three years in New York city had his able counsels and consultations on patients, on most every disease incident to dense population. I feel warranted in saving that Dr Beach has not a rival as an author and practitioner in America. He has had five gold medals awarded him as a medical author, from different societies. what no other physician ever received in this country.) The improvements and discoveries that are yearly made in this retormed medical society, by its graduates, are sent to the President and published for the benefit of themselves and community, subscriber left New York . ity five years ago and loated in East Bethel, and has visited patients in more MRS. AVERYS CERTIFICATE.

This may certify, that Providence in his afflictions saw proper to confine me to a bed of sickness about the last of August, 1836. I was attended by two respeciable physicians of the old school practice, (Drs. Fav and Rix) about 7 months, and grew worse under heir treatment, and not a friend or acquaintance hought it possible I could ever recover. I was even oft by last physician (Dr. Fay) to die, who informed my husband and my friends that "there was no use to send for any other physician, as all had been done hat could be done, and I must die in less than a I had heard of Dr Hibard, who treats on he Reformed or Vegetable Practice of Medicine, and sent for him. He did not give me much encourage-ment but concluded to try Vegetable Medicines. At that time I was reduced so low as to be helpless. I was literally nothing but a living skeleton. what is generally termed a fever sore, on the left side, near the back bone under the short ribs, which lischarged more than a gill of greenish vellow matter daily. I had a swelling near the right hip, which subsequently broke in three places. My lower limbs were much swelled, and I had a continued fever, which seemed would soon destroy me. My hopes were nearly blasted, till I began Dr II's. treatment, and from the day I took his medicines, I state the only time in my whole sickness that I was botter .-I am fully satisfied that if I had continued the min-eral practice, I should have been numbered ere this with the dead! I gained rapidly in recovering my health after taking the medicines a few weeks. I was cured of the disease in about four months after taking his meditines. I sincerely hope all who are similarly afflicted will try this mode of practice, and I believe that no one will have cause to regret it. RUTA AVERY.

Sherburne August 22, 1837. and friends of Mrs. Avery, concur in the above cer-tificate, and recommend Dr Hibbard's practice, not only for this case, but for a great variety of other diseases which have come under our observation.

Sherburne - Jeremiah Avery, Charles Shedd, Mainda W. Shedd, Roswell Adams, Wary Adams, John Eastman, Louisa Eastman, Louisa Eastman 2d, Zilpha Fuller, Amasa Fuller, Lois Fuller, Mary Haspha Fuller, Amass Fuller, Lois Fuller, Mary Hasten, Nathan Taylor, Mary Taylor, R. Estabrooks, Jr. Dorcas Estabrooks, Putrfield.—John Fuller, Sett Gibbs, Caroline Gibbs. Stockberdze.—A. Perkins, O. Perkins, Aruney Abbott, O. Durkee, O. T. Belcher. Bethel.—S. Marks, I. Burbank.

The most respectable and intelligent physicians of the times, are adopting this mode of practice; for proof of which we publish the following extract of letter addressed to Dr. Hibard, by a physician o high standing in the State of Maine

W. H.J. sell folled cloth, cutton batting, Wadding, cotton vara, backskin mittens and giores, bair combs, safe do, men's and boy's caps, fur trips.

Self-control of the process of the pr use, alone and earthern of physicians in this victory. But however satisfactory to others, it has failed of being satisfactory and binding, Lee's, Coit's Moffat's and Indian this to seyself; and if there is any system by which disis us Prils and many other articles too numerous to lease Can be subdued, without at the same time depress feathers, beef cattle, honter, beesway, rage, old from sole and upper leather, calf skins, aloep and the la, old bress, dancel fracking, fulled cloth. 2.3 this quirter. In the trestment of disease, I have THIS may certify that I have this day given my son Smith H. History, a mirror of 19, his time practice has been introduced here, but being under talents till be becomes of legal age, and I whall the management of men totally ignorant of the human system, it has failed in acquiring anything like confidence. Some of it, however, is good and calcoluted to assist nature (in some diseases) to throw off disease, but it requires judgment and physiological facts.

J. P. ALDEN.

Belliast, Maine, Jan. 15, 1840. FAMILY MEDICINE.

Those who have kept and made use of the following Passiy Medicine, in the extensive ride of the subscriber, have been obliged to call in physicians, for advice, but seldem, for the diseases for which they are recommended.

Surup for Dysentery .- This is and of the best medicines for the summer r complaints of children, now before the public, as well as for the inflamation of the bowels and stomach, heart burn, hausia and comming, so kness, cholers morbus, southess of the

stomach in pregnancy, &c. Cough Drops for croup or rattles of children, asthma or philipsic, colds, coughs, consumption, whomping cough, &c. Discrete Drops-for all diseases of the kidner and

urinary canals, diabetes, fluor albus or whites. Rheumatic Liminent-for lameness, rheumatism, sprains, braises, &c. Black Salve - for ulcers, fever sores, sores, burns,

cuts, & Ich Ointment. For the itch, and almost all eruptive diseases, where an outward application is re-

Anti-Dyspeptic Pills- for nervous debility, dyspepsia delicate female complaints, (whether in the roung or more advanced age), weakness of the kidnevs, and urinary canal, costiveness, piles, maction

of the liver and biliary organs, &c. Restoration Cordial-for indigestion, female weakness, trembling, tillious complaints, debility want plappetite, &c.

Strengthening Plaster-for wrakness of the back end loins, pains in the side, between the shoulders pit of the stomach, theumatism, &c. Alterative Syrap Powders-to purify the blood in

all cases of etaphons of the skin, scrofuls, white swelling, rickets, venercal taint, liver complaint, &c. Palmanary Balsam-tor coughs and consuption, weakness of the lungs and other viscera of the cheat, night sweats, &c.

Cophalic Sauff-for polypus, catarrh, headach &c. Anti-Bilious Physic-A common purgative for adults or children. Perfectly safe under all circumstances. The best played known for its harmless and conserve and classification and causing a gentle flow of the bile. Superior for the core of the headache, either nervous or billious, supercedes the use of the lancel in pregnamey, in immoderate flow of blood, &c.

Ferer Drept—for opening the pores of the skin and causing perspiration to fevers, colds, &c. Worms Pawder—for worms in children and adolts.

Dr. Hisaan would take this opportunity to say to many of those who are affly ted with Curonic diseases (stomach complaints, chronic inflamation and en largement of the liver, and what Calonelites call tever sores, and a great many other diseases.) that the first cause was in the use of Mercury to some of its dezen forms. Candid people are fast learning the horrid effects of mineral poisons, to produce dis tract diseases, occasioned by their destructive use More than half the rheumatisms, caries of bones, uicers and sores, beside innumerable other diseases in hundreds of cases that the subscriber has cured or greatly benefited, were first produced by the ues M mercury. It any science, profession, or society demands reform, it is the medical. The use of mercury and other mineral poisons were the erroneous inventions of misled Physicians, and ought to be superceded by the more consistent and older practice of a scientific vegetable practice. The world was more free from disease before the use of minerals, as medical remeties, than it has been since .-Minerals have made more diseases than they have cured; and the misery which they have produced in every circle of community, ought to be an indubitable reason to spura them from the materia medica.

DR. HIBARD would inform those persons wishing to consult him at his Office, for diseases, whether they reside in the vicinity or distantly, that he will, for the future, (or until further notice.) serupulously attend to the calls of invalids, on Mondays and Tuesdays of each week. His calls abroad to visit the sick are so multiplied of late, that he has been compelled to be absent on some days formerly advertised for office business, which inconvenience for istant customer he will endeaver for the luture to obviate as far as possible

Rutland, Vt. Sept. 12, 1842. The Universal Medicine of Life

The Universal Medicine of Life IPRANORETH'S PHLIS may be said to be "The Universal Medicine of Life." or they cleane any purify the blood, strengthen and invijorate the nerves and secure the priceling of degestion, by which we avoid selingholy and prevent the creation of those humours to which we owe Erystpelas. Scurvey, Goul, and those "sliny drees out o which the Stone and Gravel is formed within us."

It is now well condensated that the Brandreth Pilis have outed thousands of hopeiess and helpless persons, even when the first physicians had prononned them beyond all human means of relief. It is now not only known that the Brandreth Pilis no curis, but it is also understood flow they cure; that is by their purifying effect on the blood, that they restore the body to health.

The raise of this medicine is becoming more and more

The rathe of this medicine is becoming more and more munifest. It is recommended from family to family. The Brandreth Polls remove in an almost improceptible manner, all auxious secumulations and purify and invigorate the blood, and their good effects are not counterbalanced by an inconvenience. Being composed entirely of Vegetables they do not expose those who use them to disper; and their ef-fects are certain as they are solutary. They are dolly and safely administered to infinery youth, manhood and old age, and to women in the most critical and delicate coronnstances. They do not disturb or choke the animal functions, but restore their crider and re-earthlish their health.

The Brandeeth Puls are said at 25 cents per box at Dr.

Brandreth's New England Office.
